

eVault for the citizen in the state of India

Tecnics eVault is a comprehensive solution that allows any State & Govt entity to provide for its citizens to store important documents such as Voter Id card, Passport, PAN card, BPL card, Driving license, education certificates and many more in a safe and secure cloud infrastructure. It is aimed at minimizing the usage of physical documents and enable sharing of e-documents across departments/agencies and also allow citizens to access uploaded documents irrespective of physical location.

TECNICS

In collaboration with **IBM**

How it works?

- Govt will validate and approve the docs for future usage
- Every document will be digitally signed for security purpose
- Each document will be assigned a QR code for easy use
- A citizen dashboard and employee dashboard provides statistical Information about the uploaded and approved documents
- Documents stored in a centralized repository
- All the subscribed citizens as well govt authorities will have access

Top Features

- This project supports Digital India initiative
- Great step towards paperless governance and go green initiative
- Every document is digitally signed, this enables high-level security
- QR code will be generated for each document to enable easy access
- Centralized document repository for th whole state of TS. All Govt departments can use this to secure their physical records as a centralized repository
- Citizen mobile app helps to submit the required doc with out internet/intranet
- Repository integrates with all the departments of TS to store and access the documents
- Citizen documents can be directly uploaded into repository from any department of TS, no need to send a hard copy

Benefits to the Government

- Every Government record will be stored and secured in a safe and centralized repository
- Employees and officials with proper authentication can access the records
- Entire state, including citizens and all government departments, will have a single Electronic Content Management Solution
- Assures permanent storage of data with required security
- Mobile application provides ease of use
- Safe guards data from natural calamities and unpredicted accidents
- Saves hundreds of crores of investment with one centralized solution

Successfully implemented for the **Government of Rajasthan**
